GRAMMAR: *may, might and will* for future possibility

A LANGUAGE IN CONTEXT Read this email. How is Greg travelling to visit Matt?

Hi Greg!

I'm writing about the plans for your visit this weekend. We've planned lots of activities but it all depends on the weather. We *may* go up to the mountains to show you some of the local area, so bring your walking shoes, just in case! It *might* be a bit windy, possibly, but it probably won't rain. We've had some really good weather recently so it will probably be really sunny. But you never know in the UK, do you? I *might* not have to work on Friday when you arrive. I don't know yet. But I'll see you in the evening, in any case. And Jill will definitely meet you at the train station, so don't worry!
See you soon!

NOTICE!

Underline the phrases that talk about future possibility in the email. Which form of the verb follows *may, might* and *will*?

B ANALYSE Read the email in Exercise A again.

Function Choose the correct option to complete the sentences.

- We use *may*, *might* and *will* to talk about things that are possible in ...
 - the present or the future.
 - the past.
- We use *may* or *might* when we are ...
 - not very certain.
 - very certain.
- We use *probably will* when we are ...
 - quite certain.
 - not very certain.
- We use *will* or *definitely will* when we are ...
 - quite certain.
 - very certain.

WHAT'S RIGHT?

- I might be late tomorrow.
 I might to be late tomorrow.

READING: understanding meaning from context

When you find a word you don't know in a text, use the context to help you work out the meaning. Think about the meaning of the whole sentence and decide what the general meaning of the word might be.

A Quickly read this article, ignoring any words or phrases you don't know. Then read the sentences and choose T (true) or F (false).

What is climate change?

The word 'climate' means the average weather conditions over a number of years, including temperature, wind and rainfall. When we talk about climate change, we mean the unusual changes in the Earth's weather patterns that have happened over the last 100 years.

It is true that the weather is always changing and sometimes the weather changes in ways we really don't expect. For example, we might have a warm sunny day in the middle of winter or a cold windy day in the middle of summer. Recording the temperatures of each day helps us find the average temperature for the whole year. Doing this in many different parts of the world lets us find the average global temperature. When all temperatures are taken together, we would expect any ups and downs in the year to cancel each other out and the average temperature to stay roughly the same from one year to the next. However, scientists have found that the temperature is not staying the same and our planet is actually getting warmer each year. This is called 'global warming' and it is a major part of climate change.

Extreme changes in climate are nothing new on Earth. In its long history, there have been times when the Earth's climate became warmer, causing ice to melt and sea levels to rise so that much more of our planet was covered in water. At other times the Earth has been very cold; these 'ice ages' saw huge areas of the planet covered in snow and ice. These might sound like drastic changes in the Earth's climate, but they happened very gradually over thousands of years.

- 1 When people talk about climate change, they usually mean changes in the last century. T / F
- 2 The way the weather changes every day is the same as climate change. T / F
- 3 In the past, the Earth got very cold. T / F

B Read this sentence. What does 'weather patterns' mean? Look at the underlined words. Then choose the correct answer.

When we talk about climate change, we mean the unusual changes in the Earth's weather patterns that have happened over the last 100 years.

- a) repeated weather b) rainy weather

C  Work in pairs. Read the article again. Find and underline these words and phrases. For each one, look at the context where it appears carefully and choose the correct meaning.

- | | | |
|--------------|---|---------------------------|
| 1 expect | a) think will happen | b) think is unusual |
| 2 cancel out | a) stop something from having an effect | b) make something smaller |
| 3 roughly | a) exactly | b) approximately |
| 4 major | a) important | b) unimportant |
| 5 melt | a) become ice | b) become water |

D Find any other words and phrases in the text you don't understand. Try to work them out from the context. Then check your ideas in a dictionary.

Manchester

Manchester is a city in the north of England. It has large hills to the north and east, called the Pennines, and a number of rivers run through it. The population is about 503,000. Manchester has cold winters and warm summers. It is often cloudy and it often rains. In the past, the main industry was cotton. Today, the city is better known for its academic life, its football teams and its culture. The main things to see and do in Manchester include visiting the Museum of Science and Industry, seeing the Town Hall and shopping in the city centre.

B Think about your home village/town/city. Make notes about these things.

- geography
- climate
- what it's known for
- population
- history
- main attractions

C Write a description of your home village/town/city.

EVALUATING DIFFERENT PLANS

- Establish which factors are important.
- Evaluate how each plan affects these factors.
- Put the plans in order of preference.

A  **Work in groups. Think about the people who live in your town or city. Which of these factors do you think are most important to them? Tick four.**

- | | | | |
|---|---|---------------------------------------|--|
| <input type="checkbox"/> jobs | <input type="checkbox"/> good roads | <input type="checkbox"/> good schools | <input type="checkbox"/> good public transport |
| <input type="checkbox"/> places to enjoy nature | <input type="checkbox"/> cheap houses/flats | <input type="checkbox"/> clean air | <input type="checkbox"/> places to shop |

B  **You work for your local town/city council. The council is considering three development plans for the green area in the picture. Read the information about each plan. Choose T (true) or F (false) about each plan.**

Plan A

The council is planning to use this area for urban development. They are going to build a large number of new houses as well as other facilities, such as schools and a shopping centre. They are also going to create more roads and provide public transport to the area. They will allow a few companies to build facilities near the new development.

This plan means ...

- | | | |
|---|---|-------|
| 1 | a lot of people will come to live in this area. | T / F |
| 2 | there will be more jobs in the area. | T / F |
| 3 | local people will be able to enjoy nature. | T / F |

Plan B

The council is going to create a large park for people to enjoy. They plan to clean up the area and provide facilities such as picnic tables, barbecues and a playground for children. They are going to build several new roads to the park, but they won't allow the construction of houses, schools or shops in the green area.

This plan means ...

- 4 local people will have a place to relax. T / F
- 5 there will be lots of new jobs in the area. T / F
- 6 people will be able to enjoy clean air. T / F

Plan C

The council is planning to sell the green area to private developers. The developers want to build a small number of large, expensive houses. They are going to build new streets and a small park. The park will be exclusively for residents. The council is going to provide a bus service to the area for people who work in the houses.

This plan means ...

- 7 there will be some new jobs in the area. T / F
- 8 everyone in the town/city will enjoy the new park. T / F
- 9 a lot of people will come to live in the area. T / F

C Write the four factors you ticked in Exercise A in the first column of this table. Then look at plans A–C again and follow these steps.

- 1 Consider Plan A. Give it a score for each factor:
 +2 = the plan will have a very good effect on this
 0 = the plan will have no effect on this
 -2 = the plan will have a very bad effect on this
- 2 Write your scores in the 'Plan A' column of the table.
- 3 Repeat steps 1–2 for Plans B and C.

Factor	Plan A	Plan B	Plan C
1			
2			
3			
4			

D Add up the total score for each plan and write it in the table in Exercise C. Your preferred plan is the one with the highest score. Complete this list.

- First choice: Plan _____
 Second choice: Plan _____
 Third choice: Plan _____

E Work with another group. Compare your answers in Exercise D. Did you put the plans in the same order? What is different?

HOW TO SAY IT

Talking about effects and consequences

What effect will Plan A have on ...?

With Plan A, there will be a lot of ... / they will create ...

Plan A will have a (very) bad/good effect, so let's give it minus one / plus two.

REFLECT ... How can the skill of evaluating different plans be useful to you in **Study and Learning** and **Self and Society**?

Language wrap-up
